PROFESSIONAL SUMMARY Results-driven Business Analyst with 4+ years of experience in the Operations sector. Proven expertise in requirements gathering, process optimization, and bridging the gap between technical teams and business stakeholders. Adept at leveraging data analytics to drive operational efficiency, reduce costs, and improve workflow automation.

CORE COMPETENCIES

- **Business Analysis:** Requirements Gathering, Gap Analysis, Process Mapping, User Acceptance Testing (UAT).
- **Methodologies:** Agile, Scrum, Software Development Life Cycle (SDLC), Lean Six Sigma.
- **Technical Skills:** SQL, Python, Tableau, Microsoft Power BI, Advanced Excel, Jira, Confluence.
- **Operations & Strategy:** Workflow Optimization, Resource Allocation, Risk Mitigation, Stakeholder Management.

PROFESSIONAL EXPERIENCE

Senior Operations Business Analyst *Global Tech Solutions | Manila, Philippines | June 2023 – Present*

- Collaborated with the Operations department to analyze existing supply chain workflows, identifying bottlenecks and implementing a new digital tracking system that reduced operational delays by 22%.
- Facilitated daily Scrum meetings and sprint planning sessions, translating complex operational needs into clear technical requirements for the software engineering team.
- Designed and maintained interactive dashboards in Power BI to monitor key performance indicators (KPIs), providing real-time data visibility to C-level executives.
- Authored comprehensive documentation, including Business Requirements Documents (BRD) and Functional Specifications Documents (FSD).

Business Data Analyst *Innovate Logistics | Makati, Philippines | January 2020 – May 2023*

- Extracted and queried large datasets using SQL to evaluate vendor performance and optimize delivery routes.
- Conducted extensive gap analysis on legacy inventory management software, resulting in a successful migration to a modern ERP system.
- Led UAT sessions with 15+ end-users to ensure the newly deployed systems met all operational benchmarks and quality standards prior to launch.

- Streamlined reporting processes by automating weekly data extraction scripts in Python, saving the team 10 hours of manual work per week.

EDUCATION

Bachelor of Science in Information Technology *Graduated: May 2019 Relevant Coursework: Systems Analysis and Design, Database Management, Data Structures, Enterprise Architecture.*
